

## Academy 6.0 Server Station System Requirements

	Windows Server 2003 Windows Server 2008	XP Professional	Vista Business Vista Ultimate Windows 7 Ultimate
<b>CPU Processor</b>			
< 100Users	1.8 GHz +	1.8 GHz +	2.8GHz+
		Windows XP Professional, Vista Business and Ultimate, Windows 7 Ultimate can support up to a maximum of 50 concurrent users.	
100 – 250 Users	2.4 GHz +	Not supported	Not supported
250 – 1000 Users	3.0 GHz + (Dual processor recommended for 500 or more users)	Not supported	Not supported
<b>Memory</b>			
< 100Users	1 GB	1 GB	2 GB
100 – 750 Users	2 GB	Not supported	Not supported
750 – 1000 Users	3 GB +	Not supported	Not supported
<b>Disk Space</b>	20 GB (40 GB recommended)	10 GB (20 GB recommended)	20 GB (40 GB recommended)
	If Academy of Reading is installed with the Fluency Portfolio add-on, allow an additional 28 MB per student.		
	Allow an additional 3 MB per user, per year, per subject for the database, database backup, and log files. For example, the annual incremental disk space requirement for a student training in the Academy of READING and the Academy of MATH is 6 MB.		
<b>Video</b>	Super VGA 64 Mb recommended	Super VGA 64 Mb recommended	Super VGA 128Mb recommended
<b>Sound</b>	On-board	On-board	On-board
<b>Network</b>	100 Mbps or greater	100 Mbps	100 Mbps
<b>Other</b>		File backup system, UPS recommended	

Choose the server configuration needed to accommodate the maximum number of users given available network bandwidth as described in the **Bandwidth Requirements** section of the *Academy 6.0 Technical Specifications*.

**NOTE:** If Academy of Reading is installed with the Response to Intervention add-on, students can be registered as “Test Only”, which means they do not train in the Academy and are not counted towards the maximum number of concurrent students allowed by your license. However, if you expect to be testing a large number of these students at any given time, you should take them into account when selecting your server hardware.
